

Iceberg Commerce
Admin Product Tagging Extension 1.1.0
For Magento Version 1.4

User Manual
July 2010

Introduction

The Admin Product Tagging Magento Extension lets you add tags while editing a product. This makes it easy to add product tags in one easy step.

By default, Magento makes store owners tag from the frontend and then approve tags from the admin. Now you can add tags while editing or creating a product. The new tags will be saved as approved, so you do not have to go approve each new tag.

This extension does not change the behavior of tagging by customers. Customer added tags will still need to be approved by an admin. However, with this extension, you have the option to completely disable tagging by customers and instead tag from the product edit page.

Features:

- Adds a tab on the product edit page named "Tags Quick Add"
- From the quick add tab, easily add new tags
- New tags are auto approved so you do not have any additional steps
- Multi-store compatible
- Follows Magento Coding Guidelines. Very high quality of code and thoroughly tested. No core code is modified so next time you update Magento, this extension will continue to work!

Part One - Install Guide

Copy Files to your Magento installation directory

The First Step is to copy all files to your Magento installation directory.

1. Unzip IcebergCommerce_TagAdmin.zip
2. Copy the following folders and files to your local Magento Installation:
 - TagAdmin/app/code/community/IcebergCommerce
 - copy to magento/app/code/community/
 - TagAdmin/app/design/adminhtml/default/default/template/iceberg
 - copy to magento/app/design/adminhtml/default/default/template/
 - TagAdmin/app/design/adminhtml/default/default/layout/tagadmin.xml
 - copy to magento/app/design/adminhtml/default/default/layout/
 - TagAdmin/app/etc/modules/IcebergCommerce_TagAdmin.xml
 - copy to magento/app/etc/modules/
3. Log into your Magento admin panel
4. Flush your Magento Cache (Admin > System > Cache Management > Flush Magento Cache)

Verify Installation

This Second step will verify the module was installed correctly.

1. Go to Admin > System > Configuration > Advanced
 - Verify that IcebergCommerce_TagAdmin is listed and enabled.
2. Go to Admin > Catalog > Manage Products
 - Select a product to edit. You should see a new tab on the left side of the page called "Tags Quick Add".
Click on this tag will open up the section where you can add new product tags.

Please verify that both items in the list above appear correctly. If any of the items listed above are not displaying as listed above, please verify that you have copied all files to the correct place and that you have flushed your Magento cache.

Part Two – How to Add Product Tags

1. Log into Magento and select a product to edit or create a new product.

The screenshot shows the Magento Admin Panel interface. At the top, there's a navigation bar with 'Catalog' selected. Below it, the product title 'HTC Touch Diamond (Cell Phones)' is displayed with action buttons like 'Back', 'Reset', 'Delete', 'Duplicate', 'Save', and 'Save And Continue Edit'. The main content area is divided into a left sidebar and a main panel. The sidebar contains a 'Product Information' menu with various tabs. The 'Tags Quick Add' tab is highlighted with a red arrow. The main panel shows the 'General' product information form with fields for Name, Model, SKU, Weight, Manufacturer, Status, Tax Class, URL key, Visibility, Allow Gift Message, Set Product as New from Date, Set Product as New to Date, Auto Add Product Ids, and Is Pre-Release.

2. Click on the "Tags Quick Add" Tab
3. To add a new tag, enter a new Tag Name. Then click the "Add" button.

The screenshot shows the 'Product Tags' section of the Magento Admin Panel. At the top, there's a navigation bar with 'HTC Touch Diamond (Cell Phones)' and action buttons. Below it, the 'Product Tags' section is displayed. A yellow box contains instructions: 'Quickly add new tags to product. Type in a tag and click "Add". Add multiple tags at a time by separating tags with a "," or a "|'. Below this, there's a 'New Tag' input field with 'Cell Phone' entered and an 'Add' button. The 'Existing Tags' section is empty, showing 'No records found.'

4. Repeat for more tags. If you make a mistake, click the red "X" to remove the tag. The screenshot below shows how you can add multiple tags at once. To do this, just separate each tag with a "," or a "|";

HTC Touch Diamond (Cell Phones) [Back](#) [Reset](#) [Delete](#) [Duplicate](#) [Save](#) [Save And Continue Edit](#)

Product Tags

Quickly add new tags to product.
Type in a tag and click "Add"
Add multiple tags at a time by separating tags with a "," or a "|".

Tag Name	Action
Cell Phone	
New Tag: <input type="text" value="HTC Touch, mobile phone, HTC"/>	Add

Existing Tags

Page of 1 pages | View per page | Total 0 records found

[Reset Filter](#) [Search](#)

Tag Name	# of Use	Status
<input type="text"/>	From: <input type="text"/> To: <input type="text"/>	<input type="text"/>
No records found.		

5. Then Save the product

Product was successfully saved.

HTC Touch Diamond (Cell Phones) [Back](#) [Reset](#) [Delete](#) [Duplicate](#) [Save](#) [Save And Continue Edit](#)

Product Tags

Quickly add new tags to product.

Tag Name	Action
Quick Add <input type="text"/>	Add Tags

Existing Tags

Page of 1 pages | View per page | Total 4 records found

[Reset Filter](#) [Search](#)

Tag Name	# of Use	Status
<input type="text"/>	From: <input type="text"/> To: <input type="text"/>	<input type="text"/>
Cell Phone	3	Approved
HTC	3	Approved
HTC Touch	3	Approved
Mobile Phone	3	Approved

6. Thats it! Now you can go to the product page and see the new tags

Part Three - Uninstalling

To uninstall the module, perform the following steps:

1. Delete Files and Folders
 - `magento/app/etc/modules/IcebergCommerce_TagAdmin.xml`
 - `magento/app/code/community/IcebergCommerce/TagAdmin`
 - `magento/app/design/adminhtml/default/default/template/iceberg/tagadmin`
 - `magento/app/design/adminhtml/default/default/layout/tagadmin.xml`
2. Flush your Magento Cache (Admin > System > Cache Management > Flush Magento Cache)
